REALTECH Company Profile

REALTECH AG is an international company offering consulting services and software products for the support of business processes across its customers' entire value chain. The focus of its work is on the minimization of the administrative hassles associated with IT operation, the optimization and consolidation of existing IT infrastructures, and the monitoring and optimization of mission-critical processes. ***The success of REALTECH AG is based on two integrated business units: REALTECH Software and REALTECH Consulting.***

REALTECH Consulting assists companies in making the best use of SAP NetWeaver and supports them in their transition to a service-oriented architecture (SOA). IT systems able to map business processes, cost-efficiency, and the secure operation of SAP systems are its main priorities. Along every step of the way REALTECH provides its customers with the technology and process-related services they need to achieve their business objectives, offering invaluable support when it comes to the step-by-step introduction of new technologies.

REALTECH's theGuard! suite of solutions enables companies to effectively monitor their IT landscapes. Fully customizable views guarantee that individual users get exactly the information they need.

Administrators, for example, can stay on top of the current network status while senior managers are given the means to assess the performance of their IT-enabled business processes.
